Education

Interactive Media Level 2 – MMP

Sep 2015 – July 2016, Northern Regional College

This course introduced me to the creative industry, providing a broad foundation across print media, music technology, web authoring, and interactive design. I developed skills in page layout, sound integration, and communication for creative projects, while gaining proficiency in the Adobe Creative Suite as well as HTML and CSS.

Interactive Media Level 3 – D*D*D

Sep 2016 – July 2018, Northern Regional College

Building on the previous course, Level 3 allowed me to further refine my skills across digital and interactive media. I developed a deeper understanding of design principles, web development, and multimedia production, while continuing to strengthen my proficiency in the Adobe Creative Suite, HTML, and CSS through more advanced and independent projects.

Interaction Design – BA (Hons) 2-1

Sep 2018 – July 2021, Ulster University

During my degree, I specialised in product design, user interface, and user experience design, developing a strong focus on creating user-centred digital solutions. I advanced my skills in the Adobe Creative Suite, particularly Adobe XD, alongside Figma, while further strengthening my knowledge of HTML and CSS through research-led and practical design projects.

Work Experience

Web Designer

July 2021 – Present, INEQE Safeguarding Group

I design digital products across mobile (iOS and Android) and web platforms, contributing throughout the full design lifecycle from concept to delivery. Working with government and public sector organisations, I create user centred, accessible solutions that align with web content and accessibility guidelines, ensuring intuitive and engaging user journeys.

My work includes projects such as Safer Schools across England, Wales, Scotland, and the Isle of Man in partnership with Zurich Municipal, as well as Safer Schools NI with the Department of Education. I have also collaborated with local councils across England and organisations including the Premier League, Sport Ireland, and the Irish Football Association (IFA).

Alongside design, I contribute to front-end development and digital content creation, with experience in HTML, CSS, JavaScript, motion graphics, video editing, branding, social media graphics, JSON, and podcast production.

Skills

User research

User personas creation

User journey mapping

Prototyping (low and high fidelity)

Accessibility (WCAG standards)

Typography

Iconography

Design Tools

Figma

Adobe XD

Adobe Illustrator

Adobe Photoshop

Adobe Aftereffects
